Introduction

LevelUp is a smart platform designed to help **job seekers** successfully navigate personal **interviews** by analyzing both audio and live interviews, alongside providing accurate **CV** evaluations. The project aspires to bridge the gap between a candidate's skills and Saudi labor market requirements. The platform empowers national talent through AI-driven career tools, directly contributing to the Human Capability Development Program under Saudi Vision 2030. Our platform aims to analyze interview performance using **AI** techniques and empower users to be the "Stars of their Dream Job".

Methodology

The system was developed using Full-Stack Python/JS Ecosystem to ensure a seamless and contemporary user experience. It integrates a responsive frontend with a robust backend, offering multiple modules such as Audio Interview, Live Interview, and CV Analyzer.

Usability testing

Experiments demonstrated that **LevelUp** helps job seekers improve their CVs and interview skills. The **CV Analyzer** fixes common mistakes so that recruiters notice candidates more easily. At the same time, the **Interview Coach** helps users speak more clearly and feel less nervous. These results show that the project effectively helps people build confidence and increases their chances of getting hired In the Saudi job market.

Tools used

Conclusion & future work

LevelUp provides integrated and innovative tools for training and preparing **job seekers** for the competitive job market. **Future work** includes enhancing AI accuracy, supporting more languages, and adding real-time feedback during interviews.
