

Reem Alluhaymid, Lina Alfowzan, Sara Alwasel
Supervisor: Dr. Abdullah Alaraj

This problem is difficulty finding designers and acn designers, and not transproring the details, lack of transparency not wering customafiiid minors.

ZAWYAH establishes a transparent marketplace to connect customers with trusted interior designers, facilitating seamless collaboration and clear project visualization.

Waterfall Model

The diagram illustrates a web application architecture. On the left, two user roles are shown: **Client** and **Designer**, each represented by a person icon and an arrow pointing towards a central dashed box. Inside this dashed box, four services are arranged in a 2x2 grid: **Authentication** (shield icon with a person and checkmark), **Cloud Firestore** (orange circular icon with three white chevrons), **Firebase** (yellow and red flame icon), and **Hosting** (globe icon). Below the dashed box, a **Frontend(JS)** component is shown as a browser window icon with code symbols (</>). A double-headed vertical arrow connects the Frontend(JS) to the Hosting service, indicating bidirectional communication.

- ✓ A secure interior design marketplace for Saudi Arabia
- ✓ Facilitated client-designer connection
- ✓ Transparent pricing model
- ✓ Aligned with Saudi Vision 2030
